NSLDS School Portfolio Report for Schools (SCHPR1)

The *School Portfolio Report* (SCHPR1) provides school users with information about all William D. Ford Federal Direct Loan (Direct Loan) and/or Federal Family Education Loan (FFEL) program loans for the school code associated with the user's ID. The report output includes both consolidation loans and their underlying loans. Additionally, the report contains other useful loan information such as loan amount, current outstanding principal balance, current outstanding interest balance, delinquency date, discharge and rehabilitation/repurchased and repayment plan information.

The *School Portfolio Report* (SCHPR1) can be requested ad hoc through the list of school reports on the Report tab of the NSLDS Professional Access Web site or as a scheduled report from the School Profile section on the Org tab of the NSLDS Professional Access Web site. The report is delivered via the Student Aid Internet Gateway (SAIG).

This document contains the layout for the detail records for the comma separated values (CSV) extract version of the *School Portfolio Report*. Each report requested online will generate one or more detail records. The record layout table contains the data element name, description, and field format, as they will appear on the extract.

Ad hoc Report Request from the list of school reports on the Report tab of the NSLDS Professional Access Web site:

Parameters for the report that a user must select include:

- School Branch ID: The user may choose to receive all the data associated with the school code displayed in the School ID field by leaving the asterisk (*) in the branch ID field or for a single specific school branch location by entering the eight-digit OPEID.
- Date Entered Repay Begin Date and End Date: The Date Entered Repay Begin Date and Date Entered Repay End Date range must not extend beyond a three year period of time.
- Loan Status Categories: The category options include All, Open, Closed, Defaulted, Payment Suspended (deferment or forbearance), In-School, In-Repayment, Open Disability, and Unreinsured. See below for list of all status codes included in each category.
- Loan Program Type: This option allows the user to restrict the loan types included in the report. The options include Direct Loan, FFELP, or Both. See below for list of all loan types.

If a school has merged into a new or existing OPEID, the loans associated with the previous OPEID will be included in the new or existing OPEID's report output. The report output is sorted by SSN or Last/First Name and is available in Standard (fixed-width) or Comma Separated Values (CSV) format.

The report will be delivered to the SAIG mailbox (TG number) associated with the User ID that requested the report using the following message classes:
- SCHRPFOP – standard (fixed-width) extract
- SCHRPCOP – comma separated values (CSV) extract

Scheduled Report from the School Profile section on the Org tab of the NSLDS Professional Access Web site:

The scheduled *School Portfolio Report* provides data for a six-year period of time. The six-year window starts on the date that is three years prior to the start of the current cohort year and ends on the date that is two years after the end of the current cohort year. For example, in the cohort year which began on October 1, 2010 and ended on September 30, 2011, the six-year window is October 1, 2008 through September 30, 2013. Any loan with a Date Entered Repayment that falls within the six-year window will be included in the report.

The report output can be selected as either a standard (fixed-width) or comma separated values (CSV) extract. The user can request all records for all school branch locations associated with the user's school code or request only those records associated with the main school branch location. If a school has merged into a new or existing OPEID, the loans associated with the previous OPEID will be included in the new or existing OPEID's report output.

The report will be delivered to the SAIG mailbox (TG number) specified in the School Portfolio Profile Update page using the following message classes:

- SCHRPFOP – standard (fixed-width) extract
- SCHRPCOP – comma separated values (CSV) extract

The frequency of the report will determine the schedule when the output will be automatically generated and sent to the selected SAIG Mailbox.

NEW! The following updates have been made to the prior (June 30, 2014) version of this document:
